# Impact Climate Innovation Conference 2024

Accelerating Partnerships  
for a Net Zero Future

# Impact Climate Innovation Conference

The Impact Climate Innovation Conference is an international platform for cooperation and exchange in the climate field, dedicated to connecting innovators, decision-makers and actors from different industries and multiple subjects, accelerating the green low-carbon transition and global emission reduction process through innovation and cross-border cooperation, and jointly building a sustainable future.

With the support of the Department of Ecology and Environment of Hainan Province and Department of Commerce of Hainan Province, the conference has been listed as a "Hainan Provincial Exhibition Project" for three consecutive years from 2022 to 2024.

# Climate Innovation Gathering before COP 29

Addressing climate change is a pressing issue and common challenge facing the world. COP 28 has reached consensus on a number of issues such as the first global stocktake of the Paris Agreement, just transitions, adaptation, and loss and damage funds. The overall situation of global warming is no longer optimistic, and the world needs more ambitious solutions and practical actions.

As a climate gathering held before COP 29, responding to the call, the 2024 Impact Climate Innovation Conference is going to focus on the theme of "Accelerating Partnerships for a Net Zero Future" and advocate that more stakeholders join climate action.
